SUMMARY

Hello, My name is Hazel.
I am a Full Stack Engineer from Vietnam. Currently, I am IT Staff as Full Stack Engineer. I love working on a variety of technologies including Web Development, play CTFs and Deep Learning. My goal is to build highly performant applications that solve real-world problems and provide users with an awesome experience.

ADDITIONAL INFORMATION

- **Full Stack Web Development:** I have built a diverse array of web applications from scratch using modern technologies such as React and Flask. I have a strong proficiency in the SDLC process and frontend + backend development.
- **DevOps & Automation:** Once the application is built, I help clients set up DevOps testing, CI/CD pipelines, and deployment automation to support the successful Go-Live.
- **Tech Stack:** React, TypeScript, JavaScript, HTML5, Python, Php, SQL, MongoDB, Postman, Git, GitHub Actions, Docker, AWS, Azure, Linux ...
- **Languages:** English, Vietnamese.
